This place is a great club with a good atmosphere And lovely girls working, it's just a shame that you don't get paid the money you're owed as a dancer. I've had money owed to me for over 6 months now, when I text to enquire about it I don't even get a reply if you're a dancer be wary that you might work and end up being owed hundreds of pounds

If you a dancer/ stripper, don't ever work in that club. You will not get paid the money you are owed at the end of the night. They give you IOU's but never honour it. You literally have to fight to get your money from this club. There is a black guy who works there who l9oks like the guy in green mile and he intemidates the girls so they don't ask for their cash. That club needs shutting down for the way they treat their girls. Stay away.

Ladies work here at your own risk. Many women I know have been waiting over several months- years (from the Manchester one that closed down) to receive money owed. Their IOU system doesn't work. The owner avoids taking any accountability and they will hoard paying out money you've already earned. Management only seem to care about their own salaries being paid forgetting that no strippers = no strip club. They'll pay you on time for the first few months to lure you into a false sense of security and then stop a couple months in or once you can't commit to working numerous days of the week for them/ or when they owe

paid forgetting that no strippers = no strip club. They'll pay you on time for the first few months to lure you into a false sense of security and then stop a couple months in or once you can't commit to working numerous days of the week for them/ or when they owe you so much they feel they don't need to pay you as they know it's keeping you coming back (this defeats the whole purpose of this line of work). The power games and attempts to exploit women at this club in particular is shocking.
